## **CORBEL (Coordinated Research Infrastructures Building Enduring Life-science Services)**

The Horizon 2020-funded [CORBEL](#) [1] project aims to establish shared services between the European Strategy Forum on Research Infrastructures Biological and Medical Sciences Research Infrastructures (ESFRI BMS RIs)–which includes ECRIN–for the biomedical research community. CORBEL will achieve this by creating cross-infrastructure scientific workflows.

A suite of common services will be developed and dynamically updated in response to specific user and research infrastructure needs. Partnerships with user communities working in European programmes such as Joint Programming Initiatives (JPI) or ERA-NETs (European Research Area Networks) and private-public partnerships such as the Innovative Medicine Initiative (IMI) will be facilitated by single access points and joint services. CORBEL has received funding from the European Union’s Horizon 2020 research and innovation programme under grant agreement number 654248.
